

Erin Bojanek, M.A.

Mechanisms of sensory and motor processes in autism spectrum disorder

Erin Bojanek is a 4th year doctoral student in the Clinical Child Psychology Program at KU and an Autism Speaks Predoctoral Fellow. Her research focuses on examining sensory and motor impairments in individuals with autism spectrum disorder (ASD). Erin will discuss novel approaches used to examine motor control and visual processing in ASD in order to understand how these processes may relate to clinical symptoms of ASD.

4:00 - 5:00 p.m.
Thursday, February 13th

**Dole Human Development
Center, Room 2092
1000 Sunnyside Ave
Lawrence, KS 66045**

This seminar is supported by the Kansas Intellectual and Developmental Disabilities Research Center (KIDDRC) (U54 HD090216; KUMC PI: P. Smith; KU-L PI: J. Colombo)
